

05.09.2022

(Meetings are in Room "Lounge")

- Finding out about the required/possible technologies and creating IP from that might provide additional use cases and ways of application → Definitely desired

Tasks

Stay essentially the same: Deeper look into assigned topics will help the most.

Focus on detailing discussed approaches and providing more research on them *or* even other approaches to the problem at hand.

Look out

- no CTO on board yet
- Idea: Any connections/networks? Anybody who might want to / has the resources to work on Translue?

Business aspects

- Translue underwent changes in the past: Objective changed towards text recognition
- Now: Raising funds and customer awareness for the Translue project → Discussing methods of fundraising
